

MUDRAVEDA®

ABU® FIREBALL
FIRE EXTINGUISHING BALL

Abu® Fireball – A safe and easy to use extinguishing media

ABU Fireball stands out as a fire extinguisher fueled by MAP Powder, the most potent ABC powder employed in firefighting. Engineered for rapid deployment, it swiftly confronts flames within seconds. With its lightweight and portable design, it facilitates quick access to fire scenes, ensuring effective usage. ABU Fireball functions as a comprehensive firefighter. The straightforward action of tossing the ball into a fire initiates its activation within 5-10 seconds, releasing extinguishing chemicals efficiently to take charge and extinguish the fire.

Benefits of using Abu® Fireball

- » Light weight and easy to use
- » Can be handled and used by minors also
- » Strong and compact construction
- » Non-toxic extinguishing agents used
- » Can be easily sourced and replaced
- » Certified and tested by approved laboratory
- » Superior quality
- » Markings visible in the dark
- » Contains dry ABC powder as per 91/155 EEC guidelines

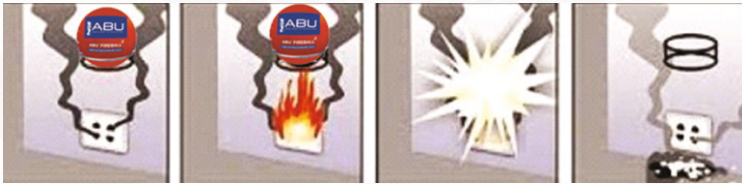

SUITABLE FOR CLASSES

HOW TO USE ABU FIREBALL

SELF ACTIVATING MOUNT

ABU Fireball offers a significant advantage by autonomously triggering in the event of a fire, even in the absence of human presence. When strategically placed in high-risk areas where fires are most likely to originate, it automatically activates when the ambient temperature reaches a certain threshold, effectively extinguishing the fire.

THROW FIRE EXTINGUISHING BALL INTO THE FIRE

When a fire erupts, simply throw ABU Fireball into fire. This will naturally fall into the base of the flame and activate within 3 seconds. No need to pull pins or to get close to the fire. No special training or skills required.
